

Sistema de lectura y cambio de fase

Diagrama de bloques General

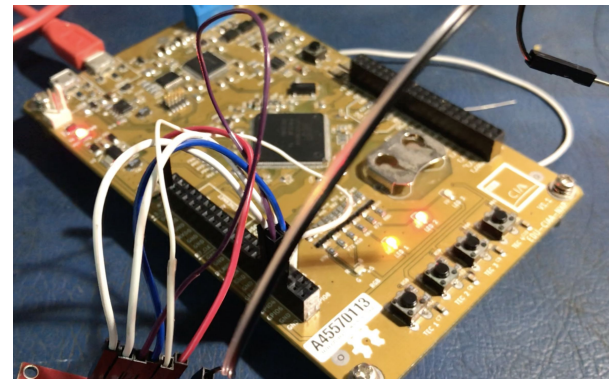

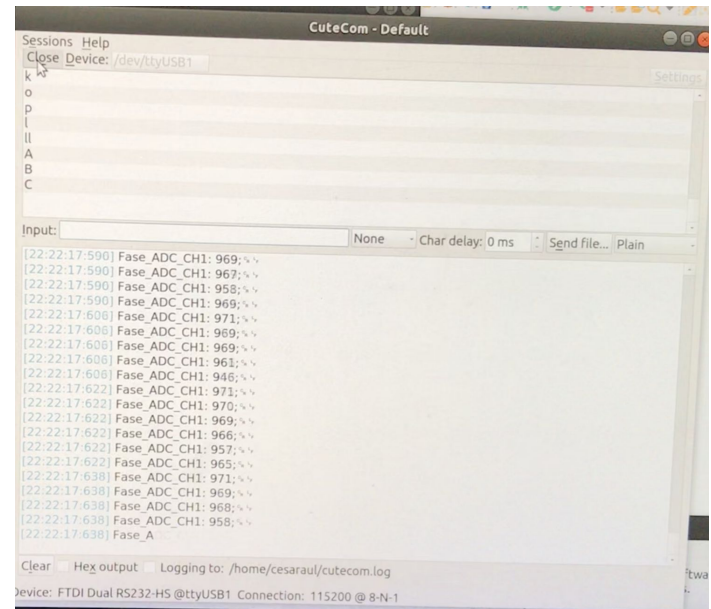

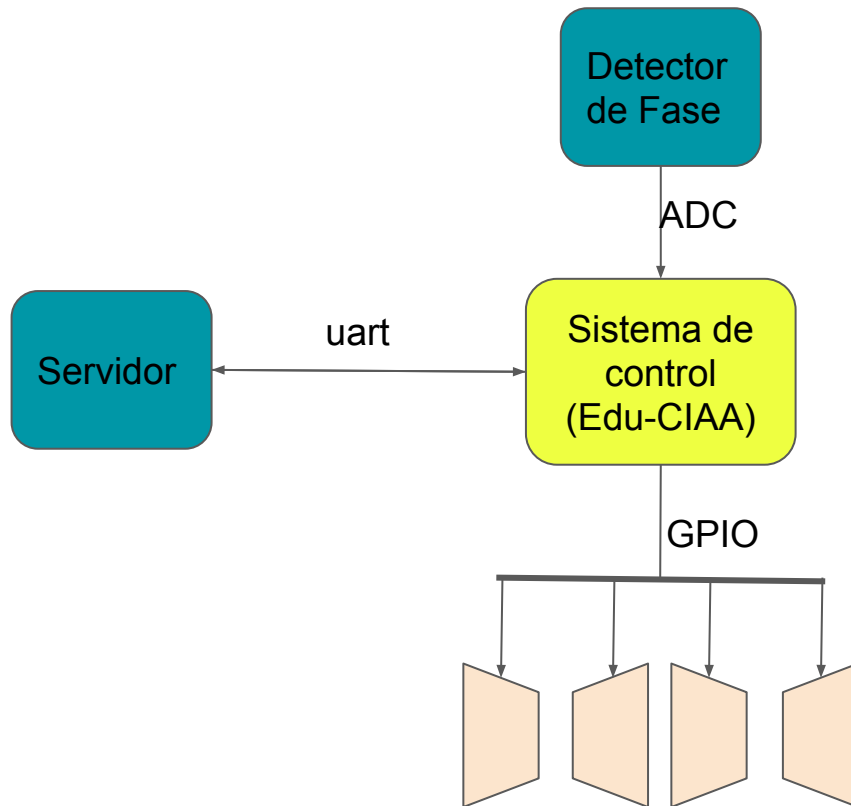

Funciones para el usuario

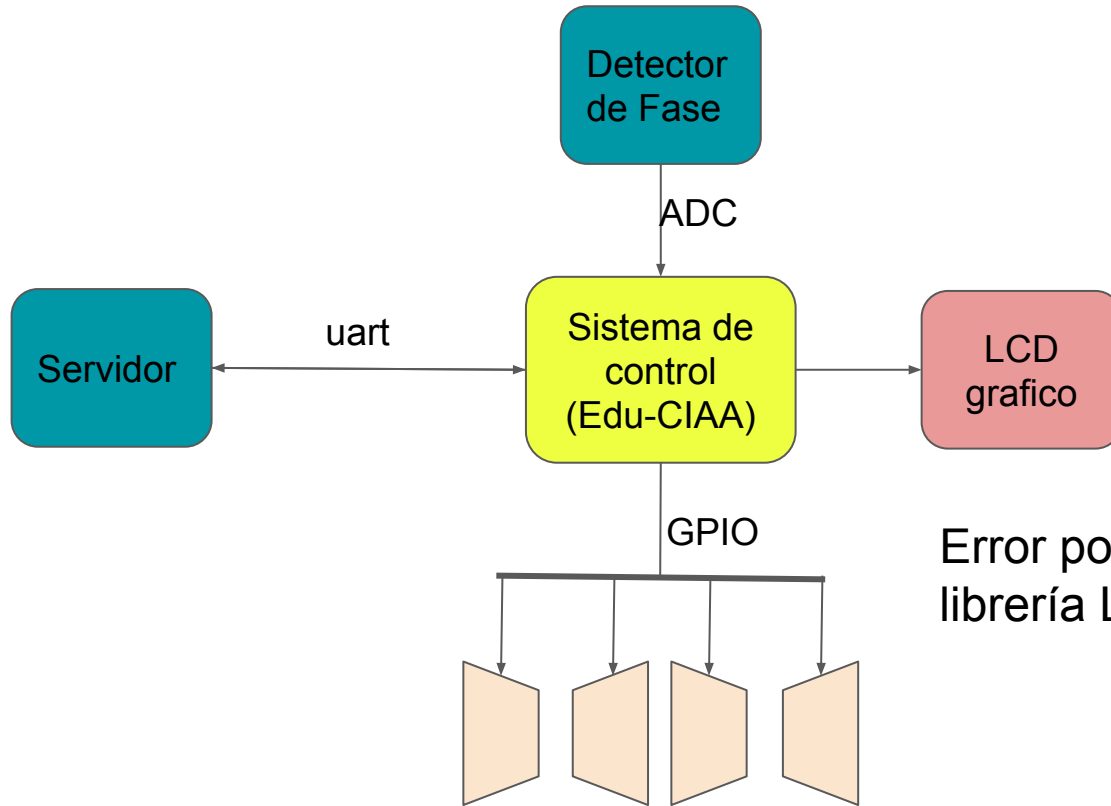

```
void LCD_init(void); //INICIALIZAR
void LCD_send_character(char c); //enviar cadena de
caracteres
void LCD_clear(void); //limpiar pantalla
void LCD_write(const char* message, uint8_t position_x,
uint8_t position_y);
```

Funciones internas

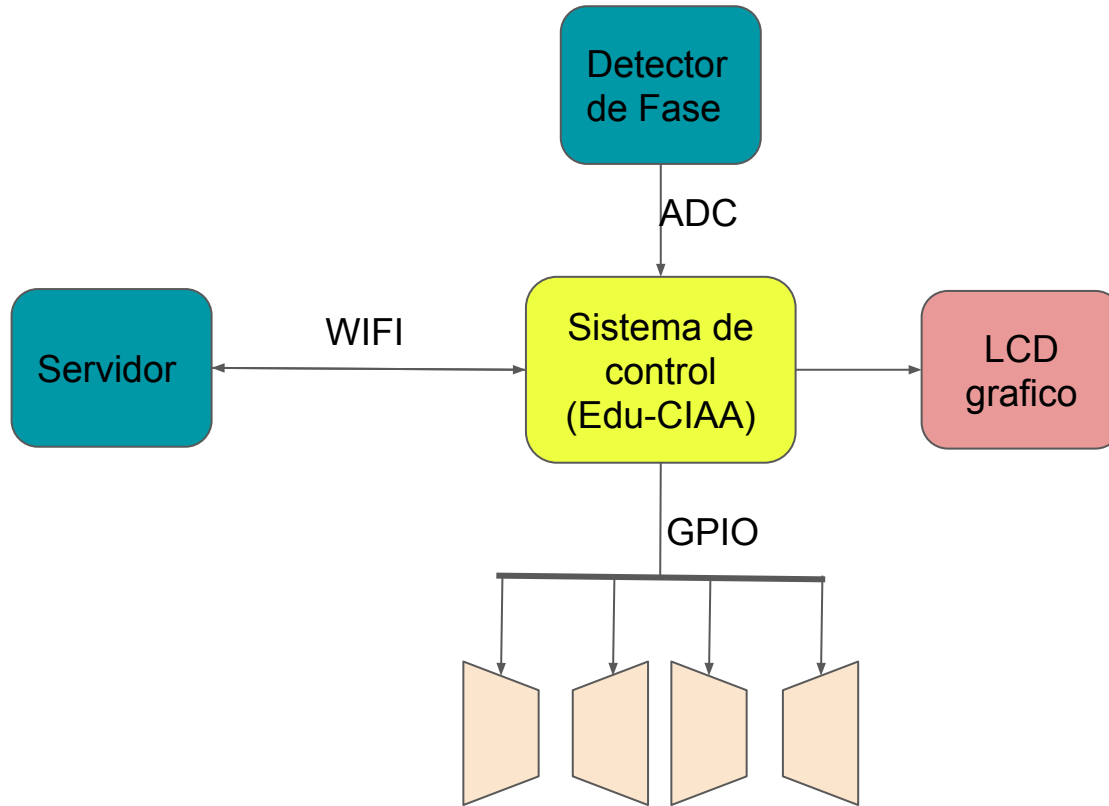

```
static void send_command(uint8_t command)
static void send_data(uint8_t data)
static void shift_out(gpioMap_t data_pin, gpioMap_t clock_pin, enum
BYTE_ENCODING_TYPES bit_order, uint8_t value)
```

Error posiblemente causado por librería LCD
